bazaarvoice®

Curations:

Content Manager (*beta*)

Discover, manage, and moderate content faster in the new, visually dynamic content manager.

Enables advanced filtering and bulk actions like approving, featuring, and labeling content so you can discover, narrow, and manage more content.

Two-click Actions

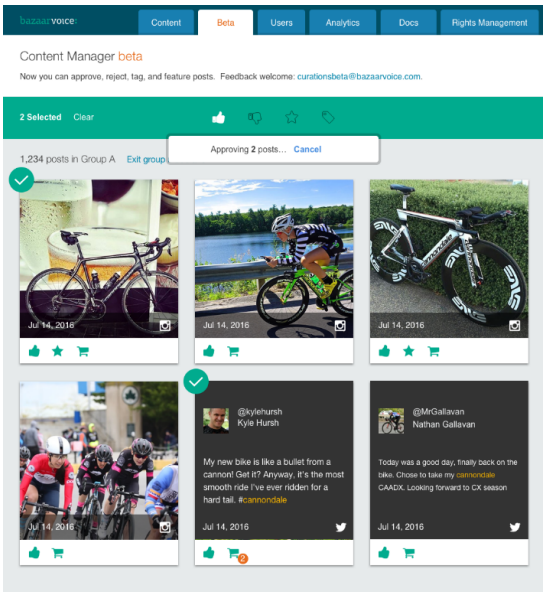
Select a group of posts and approve, reject, feature, and/or tag them in a two-click action.

Advanced Search

Discover new content by easily searching all content groups at once through keywords and hashtags, or search individual groups to find the best content by group.

Advanced Filters

Find better content faster by filtering through groups, channels, content tags, content attributes, and content types.



Go to the Beta Content Manager within your Curations console to explore this new content management experience.
